

## **Chapter 12: Building and Housing**

### **§ 12-2.3 Display, Placement and Size of Numbers.**

**[1978 Code § 9-4.4; Ord. No. 583 § 4]**

All structures which have been assigned a street number from the Tax Assessor's office of the Township shall display such numbers in such a manner that they may be readily visible from the street to individuals driving the legal speed limit of such street, to both directions of traffic. Specifically, no numbers shall be less than three inches in height nor less than 1 1/2 inches in width and will be black on a light background or white on a dark background. They shall be displayed on a free standing post, fence post, mailbox, lamp post, or similar structure at the right or left side of the driveway or pedestrian walkway to the residence. Such structure must be within 10 feet of the driveway/walkway and within 10 feet of the roadway. All businesses shall have the aforementioned numbers displayed on the front wall of the building. Brass or metallic numbers, alpha characters, and Roman numerals are not to be used to satisfy this requirement but may be used as a secondary means of identification at the discretion of the homeowner or business owner.
